

DARSHAN PARMAR

Pursuing Bachelor's in CSE

darshan0302parmar@gmail.com • [LinkedIn](#) • Vadodara

Summary

Aspiring Software Developer and Open-Source Contributor with strong hands-on experience in **full-stack web development, data analytics, and backend systems** with experience building scalable applications using **React, Node.js, MySQL, and MongoDB**. Actively contributing to open-source projects and seeking **internship opportunities** to apply problem-solving, development, and system-design skills in real-world environments.

Education

ITM SLS Baroda University

Bachelor of Technology - BTech, Computer science engineering

07/2023 - 06/2027

Projects

WanderLust – Airbnb-Style Full-Stack Web Application

Tech Stack: Node.js, Express, MongoDB, EJS, Cloudinary, Mapbox

- Built a complete listing and booking platform with authentication & authorization
- Implemented secure CRUD operations with validation and middleware
- Integrated **Cloudinary** for image uploads and **Mapbox** for interactive maps
- Followed **MVC architecture**, sessions, cookies, flash messages, and Passport.js

InsightEDU & AQI – Data Analytics Dashboard

Edunet Foundation – SAP Code Unnati Capstone Project

Tech Stack: Python, Streamlit, pandas, NumPy, Matplotlib, Seaborn

- Developed **dual interactive dashboards** analyzing district-wise education and air quality data
- Implemented dynamic filters, KPIs, and data visualizations for actionable insights
- Focused on data storytelling and comparative analysis

Service Booking Web Application

Tech Stack: React, Node.js, MySQL, Express

- Built a full-stack platform for booking services such as tutoring, car rentals, and yoga classes
- Implemented secure user authentication and role-based access
- Integrated **email notifications** using Nodemailer
- Designed scalable REST APIs for service management

Employee Management System (Desktop Application)

Tech Stack: Python, Tkinter, SQLite

- Developed a desktop application for managing employee records
- Implemented complete **CRUD functionality**
- Designed a clean GUI with structured database handling

Experience

GirlScript Summer of Code (GSSoC 2025) – Contributor

- Contributed actively to multiple open-source repositories, including issue fixes, feature additions, and code improvements.
- Merged **36+ pull requests** across various projects, earning recognition as a **top 1% contributor**.
- Worked on real-world codebases, improving documentation, frontend components, and backend features.

Skills									
•	•	Languages:	Python, C, Java, JavaScript, PHP, SQL	•	•	•	•	•	•
•		Frontend:	HTML5, CSS3, Bootstrap, jQuery, React						•
•		Backend:	PHP, Node.js, Express						
•		Database:	MySQL, SQLite, MongoDB						
•		Tools/Technologies:	Streamlit, Git, GitHub, Google Cloud, SAP Conversational AI						
•		Libraries:	NumPy, pandas, Matplotlib, Seaborn						
•		Concepts:	DBMS, OOP, DSA, Problem-Solving						

Certification									
•		Data Analysis	– Code Unnati, Edunet Foundation						
•		Data Structures & Algorithms	– Apna College						
•		C Programming	– Infosys Springboard						
•		Google Cloud Compute Basics	– Google Cloud Skills Boost
