Summary

Aspiring Software Engineer and Full-Stack Developer with hands-on experience in building web applications using React, Node.js, MongoDB, MySQL, JavaScript, and Python. Top 1% contributor in GSSoC. Passionate about software development, problem-solving, and building scalable applications, and seeking opportunities to grow through real-world development experience.

Education

ITM SLS Baroda University

Bachelor of Technology - BTech, Computer science engineering

Vadodara, Gujarat

July/2023 - June/2027

Aditi Science School

Higher Secondary Education – Science Stream

Vadodara, Gujarat

June/2021 – May/2023

Experience

GirlScript Summer of Code (GSSoC) 2025 - Open Source Contributor

- Contributed actively to multiple open-source repositories, including issue fixes, feature additions, and code improvements.
- Merged **36+ pull requests** across various projects, earning recognition as a **top 1% contributor**.
- Worked on real-world codebases, improving documentation, frontend components, and backend features.

Projects

WanderLust | Node.js, Express, MongoDB, EJS, Cloudinary, Mapbox

- Built Airbnb-style platform with authentication and role-based access
- Implemented secure CRUD operations and MVC architecture
- Integrated Cloudinary and Mapbox

InsightEDU & AQI – Data Analytics Dashboard | Python, Streamlit

- Developed **dual interactive dashboards** analyzing district-wise education and air quality data
- Implemented dynamic filters, KPIs, and data visualizations for actionable insights
- Focused on data storytelling and comparative analysis

IdeaFlow | React, Tambo AI, Vite

- Built a Generative UI app that transforms ideas into structured product blueprints
- Implemented section regeneration, AI-assisted editing, local saving, and PDF export
- Designed a SaaS-style interface and deployed on Vercel

Skills

- **Languages:** Python, C, Java, JavaScript, SQL
- **Frontend:** HTML5, CSS3, Bootstrap, React, Tailwind css
- **Backend:** PHP, Node.js, Express
- **Database:** MySQL, SQLite, MongoDB
- **Tools/Technologies:** Streamlit, Git, GitHub, Google Cloud
- **Concepts:** DBMS, OOP, DSA, Problem-Solving

Certification

- **Data Analysis** – Code Unnati, Edunet Foundation
- **Data Structures & Algorithms** – Apna College
- **Google Cloud Compute Basics** – Google Cloud Skills Boost
